

Multipurpose Cartoning Machine

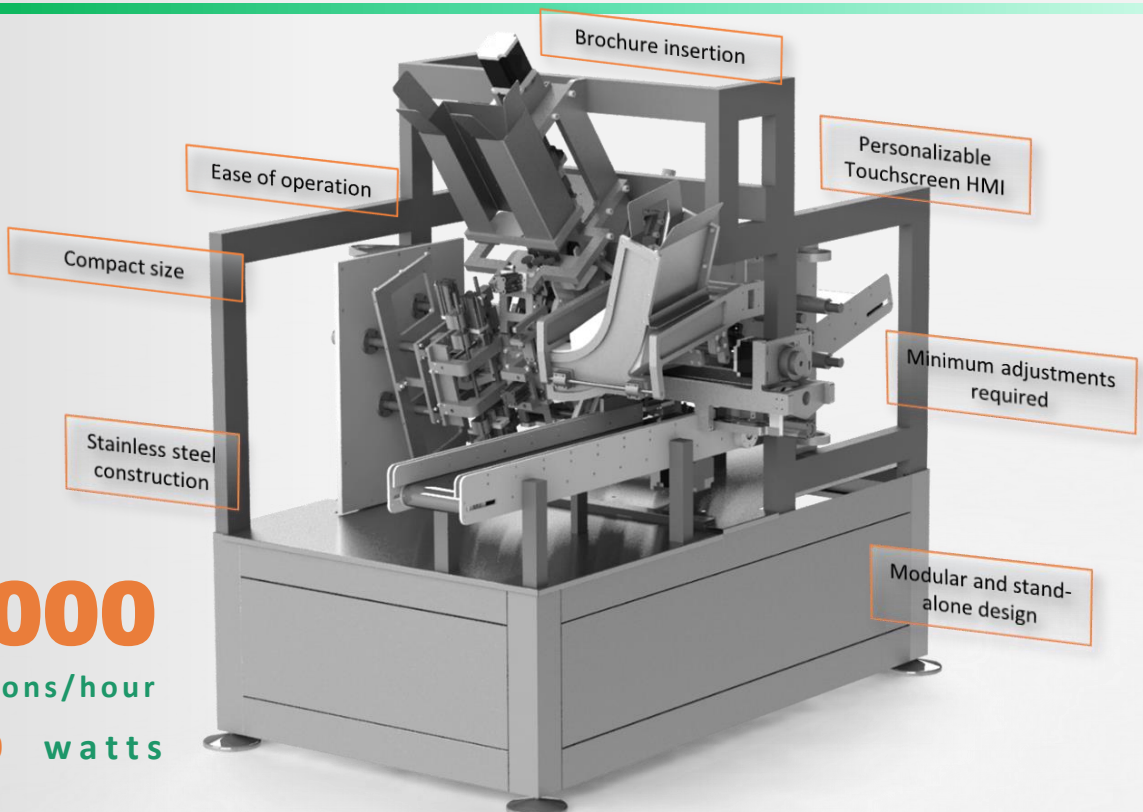

CM251K

Consistent and Reliable

The CM251K general cartoning machine is designed for diverse industries, enabling efficient and precise cartoning of various product types, including pharmaceuticals, cosmetics, and consumer goods. It adheres to GMP guidelines, ensuring easy accessibility and intuitive operation. Renowned for its stability and repeatability, the machine maintains consistent performance without requiring frequent adjustments once properly set. This versatile machine excels in cartoning accuracy and packaging reliability, making it an ideal solution for a wide range of cartoning applications.

Features

1000

cartons/hour

500 watts

Features

- ✓ **Minimal Adjustment Requirements:** Once properly set, the machine maintains consistent performance with minimal need for further adjustments.
- ✓ **High Flexibility:** Equipped with size-changeable parts and a versatile platform, it accommodates products of varying dimensions and allows for easy component redesign.
- ✓ **Ease of Maintenance:** A highly accessible design ensures effortless maintenance, inspection, and servicing.
- ✓ **Compact Size:** Its small footprint makes it ideal for installation in production areas with limited space.
- ✓ **Remote Monitoring and Control:** Enables distance troubleshooting and adjustments, reducing downtime and improving efficiency.
- ✓ **Modular Design:** Allows for customization and expansion to meet evolving production needs.
- ✓ **Low Maintenance Needs:** Engineered for reliability, the machine requires minimal ongoing maintenance.
- ✓ **Seamless Integration:** Can be easily integrated with additional systems such as automatic feeders, check weighers, and jet printers.
- ✓ **Customizable HMI:** The human-machine interface (HMI) appearance is customizable to meet specific customer preferences.
- ✓ **Stainless Steel Construction:** A complete stainless steel cover enhances safety and ensures a clean, aesthetically pleasing appearance.
- ✓ **Touchscreen Control Panel:** A user-friendly touchscreen interface simplifies operation and setup.
- ✓ **User-Friendly Operation:** Designed for simplicity, the machine requires minimal operator training.
- ✓ **Brochure Handling Capability:** Includes a brochure magazine and functionality to insert brochures into cartons efficiently.

Specifications	
Dimensions	1800x1200x1600 mm
Power	500 w
Electrical input	230 V 50 Hz
Compressed air input	4.0 bar
Product dimensions range	Width: 20-120 mm Height: 20-50 mm
Product length range	140-200 mm

Expertise in Pharmaceutical Machinery: Our seasoned team specializes in pharmaceutical machinery, tailored to the unique requirements of pharmaceutical manufacturers. We prioritize precision and reliability to ensure the safety and effectiveness of pharmaceutical products.

Quality Assurance: Our machinery adheres to the highest quality standards, utilizing premium materials and components. Rigorous testing and calibration guarantee top performance and long-term reliability.

Dedicated Support: We provide comprehensive support, including training and technical assistance, to simplify setup, operation, and maintenance. Our support team is readily available to address your needs and concerns, ensuring smooth pharmaceutical production.'
