

Pharmaceutical Labeling Machine

 **LM2420**

Quick and Accurate

The LM2420 pharmaceutical labeling machine is designed for the pharmaceutical industry, allowing for the precise application of self-adhesive labels on various cylindrical container types, including vials, ampoules, and injection pens. It follows GMP guidelines, ensuring accessibility and user-friendly control. This versatile machine excels in labeling control and reject management, making it an ideal solution for pharmaceutical labeling needs.

Features

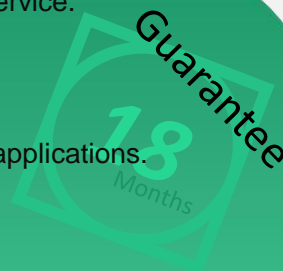

High Speed Labeling

20,000 pcs/hr

900 watts

Features

- ✓ Highly accessible design for easy maintenance, inspection, and service.
- ✓ Customizable HMI appearance to meet specific customer needs.
- ✓ Complete stainless steel cover for safety and aesthetics.
- ✓ Adaptable guides and variable speeds to accommodate different applications.
- ✓ Multi-axis adjustable dispenser, wrapper, and printer.
- ✓ Safety guards for protecting the conveyor system.
- ✓ High-speed labeling for efficient label application.
- ✓ Quick changeover for easy transition between label types and container sizes.
- ✓ Label verification system to ensure accurate and precise label placement.
- ✓ Barcode and QR code printing for tracking and identification.
- ✓ Touchscreen control panel for user-friendly operation and setup.
- ✓ In-line inspection system for defect detection.
- ✓ Variable data printing for batch numbers, expiration dates, and more.
- ✓ Remote monitoring and control for distance troubleshooting and adjustments.
- ✓ Label roll detection to prevent downtime due to low label roll.
- ✓ Modular design for customization and expansion options.
- ✓ Integration with serialization and track-and-trace systems for regulatory compliance.
- ✓ Printer compatibility: The ability to seamlessly integrate and switch between various printer types, including thermal transfer, inkjet, laser, and thermal inkjet, for versatile label customization and variable data printing.

Specifications	
Dimensions	3000x2100x1000 mm
Power	900 w
Electrical input	230 V 50 Hz
Compressed air input	2.5 bar
Product diameter range	10-100 mm
Product length range	45-280 mm

Expertise in Pharmaceutical Machinery: Our seasoned team specializes in pharmaceutical machinery, tailored to the unique requirements of pharmaceutical manufacturers. We prioritize precision and reliability to ensure the safety and effectiveness of pharmaceutical products.

Quality Assurance: Our machinery adheres to the highest quality standards, utilizing premium materials and components. Rigorous testing and calibration guarantee top performance and long-term reliability.

Dedicated Support: We provide comprehensive support, including training and technical assistance, to simplify setup, operation, and maintenance. Our support team is readily available to address your needs and concerns, ensuring smooth pharmaceutical production.
